

Time is a valuable resource. Therefore it's better to do things as quickly as possible.

Verifone Team: Verifone has a big reputation in the business, and due to the unavailability of EPR authorization, imports could have stuck in transit. And to complete a big project was very much worrisome for all of us. We knew that we could get the EPR authorization, but getting it in time was a big challenge, and every service provider did not seem so confident to get that done in a short time. GreenTek Reman's team did an excellent job and came up with our expectations. We received the EPR authorization well before the timeline given by them. To be precise, it took only 23 days. Thank you, GreenTek, and Best of Luck.

CLIENT

Verifone is a single, unified global platform that offers customers a seamless payment experience with any payment method.

CHALLENGE

As per CPCB guidelines, every producer/importer has to have EPR authorization to import or sell their electronics product listed in Schedule-I of EWM Rule 2016. After submission of the EPR application by the producer, CPCB shall evaluate the application received and grant EPR authorization within 120 days of receipt to only those complete with the requisite information. Having little details on this rule, producers are facing many problems in getting the EPR authorization.

Being a big name in their sector, Verifone always remains compliance-ready, and to get the EPR authorization, were looking for a service provider. Verifone as a brand cannot compromise with the timeline, and 120 days to obtain the EPR would affect their business very much. So they were looking for a service provider who can support them to get EPR authorization and take less time in completing all the required documentation, so there was no unnecessary delay.

SOLUTION

GreenTek Reman believes in providing the best and trustful services to their client. And in the case of Verifone, GreenTek assured to get the EPR authorization well before in time so that they can get their product imported without any delay.

GreenTek Reman's team worked on all aspects of the documentation part, came up with the best EPR plan for the Verifone, and prepared an EPR application as per CPCB guidelines.

RESULTS

GreenTek covered all requisite details in Verifone EPR Plan and all supporting documents, and as a result, Verifone received their EPR authorization in just 23 days of applying.
