

How GreenTek Reman helped with timely & safe disposal of our client's E-waste.

ABOUT THE COMPANY:

The company is one of India's leading manufacturer of electrical and electronic equipment and was founded in 1966, with a dream to play a vital role in the development of the power infrastructure of India. Over the last several years it has been associated with the introduction of the newest technologies in the field of power management solutions in India.

CLIENT TESTIMONIAL:

We are very much satisfied with the services of Greentek Reman. We do not need to worry about the timely collection and safe disposal of our e-waste as Greentek Reman has collection centers across the country and the team is always available to inform us and update us about the safe disposal of our e-waste. Thanks Greentek Reman and team.

CHALLENGE

Laws to manage E-waste have been in place in India since 2011, mandating that only authorized dismantlers and recyclers collect e-waste. As per E-waste (Management) Rules, 2016 the producers have to meet targets, which should be 20 percent of the waste generated by their sales. This will increase by 10 percent annually for the next five years. The law also says that the responsibility of producers is not confined to waste collection, but also to ensure that the waste reaches the authorized recycler/dismantler.

While the client was working towards establishing a name for itself globally in the field of power infrastructure solutions, the company also wanted to maintain responsible disposal of all E-waste generated by the company. With manufacturing plants, warehouses and offices located across the country, it was natural that some quantity of the company's E-waste be generated at every location.

The challenge the client faced was the availability of a vendor with PAN India presence and willingness to collect E-waste from all locations regardless of the quantity.

So, for safe E-waste disposal and to remain within compliance, the company approached GreenTek Reman Private Limited to help them safely dispose off their E-waste.

SOLUTION

Greentek Reman addressed all the concerns of the client by signing an agreement for PAN India e-waste collection service. Thanks to GreenTek Reman having collection centers in all regions of India, the company were able to have their e-waste collected, regardless of the quantity, and safely disposed off as well.

RESULTS

Thanks to the e-waste collection services provided by Greentek Reman, the client could get their e-waste collected from across the country and then disposed off safely. The e-waste was collected within the timelines agreed and then processed as per CPCB guidelines.
